

GILHAM ROBOTICS

TREETOP ACADEMICS

After-School Enrichment Programs

For the 2018/2019 school year, Treetop Academics will offer after-school classes to 1st-5th grade Gilham students in Robotics, Electronics, & Programming.

Our After-School Programs at Gilham Elementary

About

Treetop Academics continues our on-site Gilham class for the 2018/2019 school year.

Please take the time to read about us and our programs.

Need-Based Scholarships

Visit us online for information about need-based scholarship opportunities.

Need more Info?

Additional information about our classes, staff, camps, and projects can be found on our website at www.treetopacademics.com.

Robotics

Excellent hands-on, project-based Robotics class offered on-site at Gilham!

Registration

Our easy registration form is attached to this flier, or enroll electronically at: www.treetopacademics.com

If you have any questions about Treetop Academics or our programs, there is more information on our website or contact our Administrative Director at: jason@treetopacademics.com

Treetop Academics

At Gilham, we offer an after-school class in Robotics on Wednesdays.

We are dedicated to providing meaningful, hands on, project-based, and student-centered educational opportunities through best teaching practices and age appropriate curriculum to your elementary school students.

Treetop Academics provides academically enriching opportunities that put students at the center of learning.

While providing the tools for learning, our programs are designed to inspire kids to explore & create, use their faculties to the best of their individual ability, and test their theories about their own learning through practice, exploration, and support. In all our programs, your child will be engaged in daily project-based curriculum and activities with a focus on learning and having fun while doing it!

Classes are open to all 1st-5th grade students and we encourage all learners to join our classes, whether a program is beginning subject matter for your student, or continuing. Please read the complete flier for program descriptions and find us online.

Robotics, Electronics, & Programming

Wednesdays 2:30-3:45 p.m. October 17th- Dec. 19th Rm: STEM Cost:\$125

2018

This year, we are happy to offer our full multi-disciplinary class in robotics, programming, electronics, and computer science. Robotics will be ongoing term-to-term opportunity and returning students will be able to continue their practice and projects throughout the year with guidance and facilitation. This class will introduce the fundamentals in several areas, but not limited to circuitry, electronics, Scratch programming, and integrating these concepts with Robotics and hands-on applications. Students will be given differentiated challenges, tasks, and opportunities to increase their own individual abilities while working with others in groups.

The aim of this class is to offer opportunities for each student based on the student's prior knowledge and provide an ongoing experience/education that will build a foundation in these areas. Students will be using computers, programs, wires, circuits, etc. in building individual projects and working as part of teams throughout the year. This will be a comprehensive class with a focus on supporting the student to explore, create, and learn in the world of computer science, technology, robotics and programming.

See you there!

To Register

For All Treetop Academics programs, please register for classes using the registration form below or by going to www.treetopacademics.com for our online registration.

If using the paper form, please send the registration form along with payment to the address provided.

Our online registration method is similar to the form below, is easy, and only takes a few minutes to complete.

With either the paper or online enrollment, once your registration has been received, you will get an email confirming that we have your pertinent information, and your child is enrolled pending payment.

2018
