Transportation

For parents to find your student's bus stop. Check out this link: http://findyourstop.4j.lane.edu/liveweb/webquery/

When a student is registered for school the transportation department will be automatically assigning them to be transported to/from a bus stop nearest their home. If you do not see any stop close to your address please give transportation a call at 541-790-7474 and choose Option 1.

If you wish for your student to go to a Daycare or different address, in the Gilham neighborhood, other than your home a transportation request form should be completed. The forms are available in the office.

All kindergarten students MUST be met in the afternoon by someone listed on their emergency contact list unless they have an older sibling that they walk with. If there isn’t anyone at the bus stop to meet them, they will be returned to the school.

Safe Routes to School

Now is the perfect time to start new transportation habits! Whether your children will walk, bike, ride the bus, or carpool, a little planning and preparation can go a long way towards keeping children safe, healthy, and prepared to learn. The 4j Transportation Department's Safe Routes to School program can help with resources, information, and events to help get you and your family walking and rolling through the year. This year the program is holding a massive family bike ride on September 19th that everyone is invited to and all schools are encouraged to sign up for National Walk+Bike to School Day on October 7th this year. Let’s see how many people we can get walking and biking to school that day (and beyond)!

If you're interested in starting a carpool or walking/biking group you can enroll in the point2point/LTD "SchoolPool" program. By signing up we can find other families to share in carpool duties or walking/biking buddies for students!

Remember, safety is everyone’s responsibility: keep your eyes open, look out for each other and help everyone arrive to school safely. This means slowing down to 20 MPH in school zones, 25 MPH on neighborhood streets, and watching for children when driving. The best way to increase safety is to decrease the number of cars around a school and increase the number of students walking and biking so park and stride your way to health, safety, and fun this year!

If you have any questions or want more information you can contact the 4j Safe Routes to School Program Manager, Shane MacRhodes at 541-790-7492 or macrhodes@4j.lane.edu
